We saw classic HD remakes, we saw SS 3: BFE prequel (awesome btw) and you know what? I liked SS 2. Beated it in coop with buddy (shouldn't be played in solo) in few days! It's pretty cool that i actually missed all of major game flaws: bad story, cartoonish graphics and silly cutscenes. Last several levels were great! Tons of enemies and badass music. Got plenty of fun and give my high recommendations for coop run. **8/10**

-----  
После ремейков первых частей, после великолепной Serious Sam 3: BFE вторая часть внезапно вкатила. Да только в коопе, да с почти что бессмертием, но вкатила. Глупый сюжет и мультяшная графика, малое количество врагов и плохие ролики, все это в коопе просто не заметно. Уже после трети игры забываешь, что играешь в самую слабую игру серии. Последние уровни пролетели просто на отлично. Мясо, музыка, море удовольствия, огромные и разнообразные миры. **8/10** в коопе.. Interesting concept but not my cup of tea - you may or may not like the gameplay but I personally found it slow and not that unique.... DIARREHA!!!!!!!!!!!!!!!. this game is♥♥♥♥♥. Amazing design pack!

Review Update... Since I placed my review on the Nov 10, 2017  
Launch date for this game for this game, the developer seems to  
be showing extremely suspect and corrupt behavior to try and  
counter my negative review.. I discuss my suspicions in this video:

<https://www.youtube.com/watch?v=y8mWfIILhc0> \*\*\*\*\*

[100% Asset Flip of a the base game foundation asset kit on the Unity Store called "Space Shooter Starter Kit" from back in 2013: You can see that Unity asset kit right HERE: https://www.assetstore.unity3d.com/en/#!/content/11756](https://www.assetstore.unity3d.com/en/#!/content/11756)

[Feel free and watch me play this incomplete game which was flipped with ZERO effort put in by the asset flipping thieves Drunken Apes on my Youtube "First Play on Launch Day!" First impressions look: https://www.youtube.com/watch?v=bOd1kuA36eo](https://www.youtube.com/watch?v=bOd1kuA36eo)

[If you want to give the actual developer of this support, please DO NOT buy this, but just go buy the actual asset kit on Unity that is the victim of this asset flip theft.](#)

[Drunken Apes should be ashamed of this zero effort asset flip trash. Steam should be embarrassed that they continue to allow this zero effort trash to be uploaded and sold on their store front. NOT RECOMMENDED.](#)

[Recommended Instead: Bit Blaster XL for HALF THE PRICE, and it's actually a complete and finished game with much better gameplay. Find it right HERE: http://store.steampowered.com/app/433950/Bit\\_Blaster\\_XL/. This is a game about speed, stealth, and lighting. The lighting seems to change at random times.](http://store.steampowered.com/app/433950/Bit_Blaster_XL/)

[You play on either the light team or the dark team. If you stand still while in your element \(a light team member in the light, a dark team member in the shadow\) you disappear from sight, and can hold a button to stay hidden and move slowly. But if you dash \(your typical movement speed\), your outline becomes a bit easier to see. I've found it's easier to distinguish a moving dark team member in shadow than it was to detect a moving light team member in light, which unbalances it a bit, but it's not too bad, and I'm sure its something the devs can easily fix.](#)

[When you're attacking, it's pretty much one hit kills, though there are glancing blows. Also, when not stealthed, you're moving fast. This really leads to two types of tactics. Slow, methodical, waiting ninja strikes where you remember where you are while stealthed and wait for an opponent to either pass over you, or get close enough to dash and slice them up. It's that, or you dash around, just trying to be faster than everyone else. I've found either tactic works well, and obviously you can change up while you play, depending on the situation.](#)

[So with the dynamics at play, it makes the game feel like you're either a ninja, hiding in wait, or a samurai trying to out iajutsu everyone else. Tons of fun, tons of flavor for a simple 4 person multiplayer game \(no story, no single player except with bots\).](#)

[Just the fact that this is a PC game with local multiplayer makes me like this game, everything else about it makes me love it.](#)

[Get this game, get three friends, and play this game! NOW!, this game made me hate MLP:FIM because of how disgusting and bloody it is, i'm never going to let my children watch it!. A nice little game. You're trapped in an underground prison \(actually, a mine\) and must go up level by level to escape, avoiding guards and other dangers. The levels get harder and harder. Nothing cerebral, but fun. 8/10. I liked the concept of the game, I really did. Running around feeling like some parkour master above the clouds. One major selling point is the grappling hook however, which brings me to say no to the game, because of it infuriating me whilst playing the game. The grappling hook just feels weird using, it's way too hard to connect with your curser, the auto aim works a few times, but there's often times where the auto aimer tells you that it's going to connect, then it doesn't. A lot of times it feels as though it has a longer range then it has, making you having to repeat the same obstacle for ten minutes, just because of the grappling hook screwing you over. It's a good and pretty relaxing game, but over all, my experience with the grappling hook just made me not want to launch it again.](#)
